1. Organization, Nature of Operations

Monument Mining Limited (the "Company") is a natural resource company engaged in exploration and development of gold mineral properties. Its primary activities include pre-construction activities related to the engineering design of the processing plant for the Selinsing Gold Project and exploration activities on the Damar Buffalo Reef exploration prospect (note 5). The Company's head office is located in Vancouver, BC, Canada. Its gold project development and exploration operations are carried out in Malaysia through Polar Potential Sdn. Bhd., its 100% wholly owned integrated foreign subsidiary, incorporated under the laws of Malaysia.

The Company is in the process of exploring its mineral properties and with the exception of Selinsing Gold Project, has not yet determined whether its mineral properties contain economically recoverable mineral reserves. The underlined value and the recoverability of the amount shown for mineral property interests do not necessarily represent or indicate future values. The recoverability of the amount shown for mineral properties is dependent upon the discovery of economically recoverable resources, the ability of the Company to obtain the necessary financing to continue operations, pay off debt facilities, to complete the development and exploration of the mineral property interests, and future profitable production or proceeds from the disposition thereof.

At September 30, 2007, the Company has a working capital deficiency of \$5,706,221 and a deficit of \$2,109,967. The ability of the Company to carry out its planned business obligations depends on its ability to obtain adequate financing from lenders, shareholders and other investors. The outcome of these matters cannot be predicted with certainty at this time.

2. Basis of Presentation and Summary of Significant Accounting Policies

These unaudited interim consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles for interim financial information and accordingly, do not include all disclosures required for annual financial statements.

The unaudited interim consolidated financial statements reflect, in the opinion of management, all adjustments and reclassifications necessary to present fairly the financial position, results of operations and cash flows at September 30, 2007 and for all periods presented. The results of operations for the three month period ended September 30, 2007 are not necessarily indicative of the results for the full year.

The statements should be read in conjunction with the June 30, 2007 audited consolidated annual financial statements included in the June 2007 Annual Report filed with the Securities Commissions. The financial statements reflect the same significant accounting policies as those described in the notes to the audited consolidated financial statements of Monument Mining Limited for the four months period ended June 30, 2007, except that the Company has adopted the following CICA guidance effective January 1, 2007. These standards have been adopted on a prospective basis with no restatement to prior period financial statements.

Financial Instrument

Under Section 3855 - Financial Instruments, Recognition and Measurement, all financial instruments are classified into one of five categories: held-for-trading, held-to-maturity investments, loans and receivables, available-for-sale financial assets or other financial liabilities. All financial instruments are measured in the balance sheet either at fair value except for loans and receivables, held-to-maturity investments and other financial liabilities which are measured at amortized cost. Subsequent measurement and changes in fair value will depend on their initial classification, as follows: held-for-trading financial assets are

measured at fair value and changes in fair value are recognized in net income. Available-for-sale financial instruments are measured at fair value with changes in fair value recorded in other comprehensive income until the instrument is removed from the balance sheet.

As a result of the adoption of these new standards, the Company has classified its cash and cash equivalents and short-term investments as held-for-trading. Accounts receivable are classified as loans and receivables. Accounts payable, certain accrued liabilities and long-term debt are classified as other liabilities, all of which are measured at amortized cost.

The adoption of these new standards had no impact on the Company's deficit position as at July 1, 2007.

Comprehensive Income

Under Section 1530 - Comprehensive Income, comprehensive income is the change in shareholders' equity during a period from transactions and other events and circumstances from non-owner sources. Under this section, the Company is required to present comprehensive income and its components in a financial statement showing (a) net income for the period; (b) each component of revenue, expense, gain and loss that is recognized in other comprehensive income and (c) the total of (a) and (b). As at the end of September 30, 2007, the Company has no other comprehensive income, and as such, a statement of comprehensive income has not been included in these financial statements.

As a consequence of adopting Section 1530 and 3855, the Company has also adopted the Section Section 3861, "Financial Instrument — Disclosure and Presentation", and Section 3865, "Hedges".

(d) Stock options

The New Stock Option Plan came into effect on June 25, 2007 (the "2007 Plan"). The 2007 Plan was approved at the Shareholders' Annual General Meeting held on October 25, 2006 and rectified at the Shareholders' Annual General Meeting held on August 31, 2007. It allows the Company to grant stock options to its directors, officers, employees and consultants up to a maximum 10% of the outstanding common shares of the Company at any time. Under the 2007 Plan, 4,600,000 common shares have been reserved and issued as at July 5, 2007.

Stock option activity is as follows:

	Number of common shares under option	Weighted average exercise price
Balance, June 25, 2007	-	\$ -
Granted	4,600,000	\$ 0.50
Balance, September 30, 2007	4,600,000	\$ 0.50

The following table summarizes the stock options outstanding at August 31, 2006:

Exercise price	Options outstanding			Options exercisable	
	Number of common shares	Expiry date	Weighted average exercise price	Weighted average Number exercisable	Weighted average exercise price
\$0.50	4,600,000	July 5, 2012	\$0.50	4,600,000	\$0.50

The exercise price of all share purchase options granted during the period are equal to the closing market price at the grant date. Using an option pricing model with assumptions noted below, the estimate fair value of all options granted during three months ended September 30, 2007 have been reflected in the statements of operations as follows:

	Three months ended	
	September 30, 2007	August 31, 2006
Exploration and development	\$ 130,948	\$ -
Administration and operation	1,293,598	-

(F ORMERLY MONCOA CORPORATION)
Notes to Consolidated Financial Statements
For the three month period ended September 30, 2007

7. Share Capital (continued)

(d) Stock options (continued)

The weighted average assumptions used to estimate the fair value of options were:

	Three months ended	
	September 30, 2007	August 31, 2006
Risk free interest rate	4.60%	-
Expected life	5 year	-
Vesting period	Zero to 2 years	-
Expected volatility	77%	-
Expected dividends	nil	-

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models may not necessarily provide a reliable measure of the fair value of the Company's share purchase options.

(e) Agent's options

Agent's option activity is as follows:

Expiry date	Exercise price	Balance, June 30, 2007	Exercised	Balance, September 30, 2007
June 25, 2009	\$0.50	2,000,800	(6,000)	1,994,800

10. Segment disclosures

The Company's one reportable operating segment is the acquisition of mineral properties. Geographic information is as follows:
