SELINSING GOLD MINE

The Selinsing Gold Mine includes the Selinsing Gold property, Buffalo Reef property, Felda land and Famehub properties. Updated resources & reserves show Selinsing as a sulphide gold rich project (see NI43-101 Technical Report Prepared by Snowden, filed Dec. 14, 2016 on SEDAR). A Front End Engineering Design Study/internal Definitive Feasibility Study being carried out to deliver an Implementation Execution Plan for the Sulphide Project.

MURCHISON GOLD PROJECT

The Murchison Gold Project comprises the Burnakura, Gabanintha, and Tuckanarra properties in Western Australia. Site preparation and development for early stage production is ongoing, while progressing towards a Preliminary Economic Assessment Study ("PEA") on the Burnakura life of mine areas with exploring underground potential. A deep drilling program is planned at the NOA7_8, which has the potential to increase the life of mine, in conjunction with the early stage production plan.
