

This is the 1st affidavit
of Stephanie White in this case
and was made on 07/November/2014

No. **S-148 601**
Vancouver Registry

IN THE SUPREME COURT OF BRITISH COLUMBIA

**IN THE MATTER OF SECTION 133(3) OF THE
CANADA BUSINESS CORPORATIONS ACT, R.S.C. 1985, c.C.44, AS AMENDED**

MONUMENT MINING LIMITED

PETITIONER

AFFIDAVIT

I, Stephanie White, Legal Administrative Assistant, of 1700 - 666 Burrard Street, in the City of Vancouver, in the Province of British Columbia, V6C 2X8, SWEAR THAT:

1. I am a legal assistant at the law firm of Stikeman Elliott LLP, counsel for the Petitioner, Monument Mining Limited, and as such have personal knowledge of the matters and to which I now depose except where stated to be based on information and belief and where so stated I verily believe them to be true.
2. Based on my review of the service fee lists of three process servers (attached as Exhibits as described below), the cost of personal service in the Greater Vancouver Area ranges from approximately \$60 to \$202 for an individual and approximately \$55 to \$192 for a company. The cost will depend on location of the party being served and the urgency for completing service.
3. If the party being served is outside the Greater Vancouver Area, the cost will increase by a range of approximately \$33 to \$125, depending on the location.
4. Attached to this Affidavit and marked as **Exhibit "A"** is a true copy of the process serving fee schedule of Action Process Serving Ltd. as of November 7, 2014.

5. Attached to this Affidavit and marked as **Exhibit "B"** is a true copy of the process serving fee schedule for Dye & Durham Corporation as of November 7, 2014.
6. Attached to this Affidavit and marked as **Exhibit "C"** is a true copy of the process serving fee schedule for West Coast Title Search Ltd. as of November 7, 2014.
7. Attached to this Affidavit and marked as **Exhibit "D"** is a true copy of a news release dated February 10, 2014.
8. Attached to this Affidavit and marked as **Exhibit "E"** is a true copy of a news release dated August 28, 2014.
9. Attached to this Affidavit and marked as **Exhibit "F"** is a true copy of a news release dated September 4, 2014.
10. Attached to this Affidavit and marked as **Exhibit "G"** is a true copy of a news release dated September 29, 2014.

Law Firms

Our service fee for individuals includes 3 attempts at each address or 15 min wait time. Kilometers are charged from the nearest of the Vancouver (minimum 5km one way), New Westminster, (minimum 10 km one way) or Abbotsford (minimum 30 km one way). After 3 attempts, the per attempt charge is \$10.00 per attempt and only one way kilometers are charged. Rush services are based on actual kilometers travelled for first attempt and Super Rush services are based on actual kilometers travelled for all service attempts.

Rush services are services, which require same day attention either because of a looming deadline or special service requirements. Super Rush services are services which require our servers to stop what they are doing and attend to your service immediately, or services requested outside regular services hours.

Simply put, it often takes more than three attempts to serve individuals. We need to attend at different times of the day to catch individuals, so we need six days to make an evening, morning, afternoon, and weekend attempt. If we don't get six days because of your service requirements, a rush fee is applicable. Appointments at specific times arranged by clients are subject to Super Rush fees. If we get a hot tip on the whereabouts of a party to be served and we successfully serve, there is a \$10.00 rush fee applicable.

Regular Services hours:

9 a.m. - 10 p.m.	Monday to Thursday
9 a.m. - 7 p.m.	Friday
8 a.m. - 1 p.m.	Saturday, Sunday and Holidays

Service Fees:

Kilometers charged from Vancouver, New Westminster or Abbotsford Courthouse (whichever is closer) subject to minimum charge mentioned above. Kilometers charged one way only after the third unsuccessful attempt to help reduce costs.

This is Exhibit marked "A" referred to in the Affidavit of

Sworn before me at the city of Vancouver, Province of British Columbia, this 7th day of November, 2014.

News Release

Release #13 - 2014
A Commissioner for taking Affidavits for British Columbia

Monument Mining Announces Full Results of Annual General Meeting of Shareholders

Vancouver, British Columbia, February 10, 2014 – Monument Mining Limited (TSX-V: MMY and FSE: D7Q1) ("Monument" or the "Company") today announced the full results from its Annual General Meeting (the "Meeting") held on February 7, 2014 in Vancouver, B.C. The Meeting had a record high turnout of shareholders representing approximately 75% of its issued shares eligible to vote at the meeting. Shareholders at the Meeting fixed the number of directors at seven and the seven Monument nominees who received the most votes were elected to the Board.

"The record turnout and strong endorsement by shareholders of the Company's directors and management represent significant support for the Company going forward," said Robert F. Baldock, Monument's President and CEO. "We look forward to delivering on the clear, disciplined plan we have in place, and continued work to build additional value for our shareholders."

Further information concerning the results of the meeting is set out below.

Board of Directors

At the Meeting, shareholders elected the following of management's nominees as directors for the ensuing year: George Brazier, Robert F. Baldock, Cathy Zhai, Zaidi Harun, Gerald Ruth, Frank Wright and Graham Dickson. Director nominee Jean-Edgar de Trentinian received the fewest "for" votes of the eight management nominees. Given the shareholder-approved motion to set the number of directors at seven, Mr. de Trentinian was not elected to the Board.

Auditor

Shareholders re-appointed Grant Thornton LLP, Chartered Accountants, to serve as the Company's auditors for the ensuing year and authorized the directors to fix the auditor's compensation.

Stock Option Plan and Grant of Stock Options

The adoption by the Company of a fixed stock option plan, as described in the Information Circular disseminated in connection with the Meeting, was approved by shareholders. The grant by the Company of additional stock options was not approved.

For more information on these matters, please refer to Monument's information circular, available on SEDAR (www.sedar.com) or visit our website at www.monumentmining.com.

About Monument

Monument Mining Limited (TSX-V: MMY, FSE: D7Q1) is an established Canadian gold producer that owns and operates the Selinsing Gold Mine in Malaysia, with production cash costs among the lowest in the industry. Its experienced management team is committed to growth and is advancing several exploration and development projects in Malaysia, including the 100% owned, development stage, Mengapur Polymetallic Project. The Company employs 330 people in Malaysia and is committed to the highest standards of

environmental management, social responsibility, and health and safety for its employees and neighboring communities.

Forward-Looking Statement

This news release includes statements containing forward-looking information about Monument, its business and future plans ("forward-looking statements"). Forward-looking statements are statements that involve expectations, plans, objectives or future events that are not historical facts and include: the Company's plans for building and operating magnetite production facilities, the Company's plans to extracting and process magnetite from surface materials, the grade of the stockpiled materials being purchased by Monument, and all of the other plans with respect to its mineral projects and the timing and results of proposed programs and events referred to in this news release. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". The forward-looking statements in this news release are subject to various risks, uncertainties and other factors that could cause actual results or achievements to differ materially from those expressed or implied by the forward-looking statements. These risks and certain other factors include, without limitation: the risks regarding production referred to in this news release; the risk that the market price of gold, copper, magnetite and other metals decreases significantly; risks related to general business, economic, competitive, geopolitical and social uncertainties; uncertainties regarding the results of current exploration activities; uncertainties in the progress and timing of development activities; foreign operations risks; other risks inherent in the mining industry and other risks described in the management discussion and analysis of the Company and the technical reports on the Company's projects, all of which are available under the profile of the Company on SEDAR at www.sedar.com. Material factors and assumptions used to develop forward-looking statements in this news release include: the Company's assumption that the stockpiled materials and the surface materials on Area C will contain the grade of magnetite that the Company expects; the Company's expectation that process facilities can be built on budget; expectations regarding the estimated cash cost per ounce of gold production and the estimated cash flows which may be generated from the operations, general economic factors and other factors that may be beyond the control of Monument; assumptions and expectations regarding the results of exploration on the Company's projects; assumptions regarding the future price of gold or other minerals; the timing and amount of estimated future production; the expected timing and results of development and exploration activities; costs of future activities; capital and operating expenditures; success of exploration activities; mining or processing issues; exchange rates; and all of the factors and assumptions described in the management discussion and analysis of the Company and the technical reports on the Company's projects, all of which are available under the profile of the Company on SEDAR at www.sedar.com. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

Release #22- 2014

Monument Enters Agreement to Acquire Tuckanarra Gold Project in Western Australia

Vancouver, B.C., August 28, 2014, Monument Mining Limited (TSX-V: MMY and FSE: D7Q1) "Monument" or the "Company" is pleased to announce it has entered into the "Tenement Purchase Agreement" with Phosphate Australia Limited ("POZ"), a company whose ordinary shares are listed on the Australian Stock Exchange ("ASX") for the acquisition of the Tuckanarra Gold Project in Western Australia.

Pursuant to the Tenement Purchase Agreement, the Company has agreed to acquire, free and clear of any encumbrances, a 100% interest in the Tuckanarra Gold Project consisting of eight exploration and prospecting licenses and a mining lease application covering a total of 99.73km² in the Murchison Mining District in Western Australia and containing approximately 100,000 historical indicated and inferred JORC compliant ounces of gold as detailed below. Native title has been extinguished over all the historical gold resources, with the exception of the Miners' Dream resource. There are no private royalty encumbrances.

The consideration for acquiring the Tuckanarra Gold Project is comprised of A\$2,000,000 in cash and the issue of 10,000,000 Monument common shares at a deemed issue price of C\$0.25 per share. The acquisition is subject to satisfactory completion by the Company of due diligence in respect of the Tuckanarra Gold Project and receipt of TSX Venture Exchange acceptance in the case of the Company.

A non-refundable deposit of A\$50,000 was paid to secure an exclusivity period for the Company to conduct due diligence, which will be applied against the cash portion of the purchase price upon closing. The parties have agreed to complete the acquisition five business days after completion of due diligence by the Company and receipt of required approvals of regulatory authorities or such other date as agreed. The acquisition is expected to be completed by October 24, 2014.

The Tuckanarra Gold Project is situated approximately 690km north of Perth and straddles the Great Northern Highway, 75km to the south of Meekatharra in the Murchison Province of Western Australia, and approximately 40 Kilometers south west of the Burnakura mill that Monument has recently acquired. The Tuckanarra land holdings also has a section of the main ore haulage road that can be accessed from the main sealed Perth-Meekatharra Highway to the Burnakura mill facility. The close proximity to Monument's Burnakura mill will allow the Company to accelerate development of the property.

The Tuckanarra Gold Project contains a historical indicated resource of 1.04 mt @ 1.65 g/t Au for 55.2 kOz and a historical inferred resource of 0.92 mt @ 1.51 g/t Au for 44.6 kOz within eleven separate prospects, determined by Ravensgate in its November 2012 "Independent Resource Model Report" according to the JORC guidelines 2004. The historical resources are estimated using ordinary Kriging and are reported above a block grade of ≥0.5 g/t Au. The Company believes that the quality of the data supporting the resources meets industry standards. The historical resources confidence categories and the reliability of the estimate are consistent with the JORC 2004 guidelines. However, readers are cautioned that a qualified person (within the meaning of National Instrument 43-101) has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves. The Company is not treating the historical estimate as current mineral resources or mineral reserves.

If the acquisition is completed, the Company plans to conduct a confirmation, in-fill and expansionary drilling program including duplicating the metallurgical studies previously carried out with a view to producing a scoping study review.

Table 1: Historical resource inventory and the historical classification as per JORC 2004

The technical information concerning the Tuckanarra Gold Project in this press release has been compiled, reviewed and approved by Darryl Mapleson (BSc (Hons), FAusIMM) who is retained by Monument Mining Limited as a Qualified Person as defined by National Instrument 43-101, and a Competent Person as defined by JORC guidelines. He has been working in Australia for Monument as an independent consultant.

About Monument

Monument Mining Limited (TSX-V:MMY, FSE:D7Q1) is an established Canadian gold producer that owns and operates the Selinsing Gold Mine in Malaysia. Its experienced management team is committed to growth and is advancing several exploration and development projects including the Mengapur Polymetallic Project, in Pahang State of Malaysia, and the Murchison Projects in Burnakura and Gabanintha, Western Australia. The Company employs over 300 people in both regions and is committed to the highest standards of environmental management, social responsibility, and health and safety for its employees and neighboring communities.

MONUMENT
MINING LIMITED

September 4, 2014

A Commissioner for
Affidavits for British Columbia

Release # 23- 2014

Monument Announces Proposed Transaction to Acquire Joint Venture Properties and Concurrent Private Placement

Vancouver, B.C., September 4, 2014, Monument Mining Limited (TSX-V: MMY and FSE: D7Q1) ("Monument" or the "Company") is pleased to announce that it has entered into a heads of agreement (the "Heads of Agreement") with Gascoyne Resources Limited ("GCY"), a company whose ordinary shares are listed on the Australian Stock Exchange ("ASX"), for the acquisition of 50% interests in three properties located near Burnakurra, the Murchison region of Western Australia by way of joint venture arrangements (collectively "Gascoyne JV Properties Acquisition"); and concurrently it has arranged a "part and parcel" private placement financing integral to the Gascoyne JV Properties Acquisition to fund exploration and development of the acquired properties. The Gascoyne JV Properties Acquisition and the private placement are inter-dependent and shall be closed concurrently (collectively the "Proposed Transaction").

Gascoyne JV Properties Acquisition

Pursuant to the Heads of Agreement, the Company has agreed to acquire, free and clear of any encumbrances except for certain royalty interests, a 50% interest in the Dalgara, Glenburgh and Mt. Egerton properties ("Joint Venture Properties") from GCY, subject to certain conditions, through three separate joint venture agreements on each of the three properties (see Appendix A: Murchison Gold Field with Surrounding Tenements). The terms for the three separate joint venture agreements to be entered into on completion of the Gascoyne JV Properties Acquisition will allow the Company to be the manager in respect of mine development and mining operations on the Joint Venture Properties and GCY to be the manager in respect of exploration of the Joint Venture Properties.

The consideration for the 50% interests in the Dalgara, Glenburgh and Mt. Egerton properties is the issue of 100,000,000 Monument fully paid common shares at a deemed issue price of C\$0.25 per share. The Gascoyne JV Properties Acquisition is subject to, among other things, execution of formal documentation, satisfactory completion by each party of due diligence, obtaining various consents and waivers from GCY's current joint venture partners, the exercise of the option to acquire the Mt. Egerton properties, obtaining all regulatory approvals, including receipt of TSX Venture Exchange ("TSXV") acceptance in the case of the Company, receipt of ASX approval in the case of GCY and any required approvals under Australian foreign investment requirements, shareholders' approval where required and completion of the concurrent "part and parcel" financing of C\$25,000,000 as described herein.

Monument Private Placement

In conjunction with Gascoyne JV Properties Acquisition, the Company is arranging a financing from a third party by way of private placement (the "Monument Private Placement") of 100,000,000 shares of the Company at an issue price of C\$0.25 per share for aggregate proceeds of C\$25,000,000, subject to the TSXV acceptance and committee approval in the case of the placee. The Monument Private Placement must be concurrently closed with the Gascoyne JV Properties Acquisition and Gascoyne Private Placement; the funds from the Private Placement shall be used for completion of the Proposed Transaction, exploration programs and mine development of the Joint Venture Properties.

Gascoyne Private Placement

In addition, in conjunction with the Gascoyne JV Properties Acquisition, the Company has agreed to subscribe for an aggregate of 20,000,000 GCY ordinary shares at A\$0.25 per share for total of A\$5,000,000 through a private placement (the "Gascoyne Private Placement"), subject to the ASX acceptance, GCY shareholder approval if required and TSXV acceptance in the case of the Company. Of which 4,000,000 GCY shares shall be subscribed for and issued within five business days after the date of execution of the Heads of Agreement and the remaining 16,000,000 GCY ordinary shares shall be subscribed and issued upon the closing of the Proposed Transaction. Thereafter, the Company will purchase another 8,620,690 GCY ordinary shares at A\$0.29 per share for A\$2,500,000 within 12 months intending to bring the Company total shareholding to 15.31% of the entire issued and outstanding GCY ordinary shares. The funds generated by GCY from the 16 million Gascoyne Private Placement are to be used to implement exploration programs on the joint venture properties.

After reaching 15.31% of shareholding in GCY, Monument will be granted further options, exercisable within twelve month period, to acquire further GCY shares at A\$0.29 per share, bringing its shareholding in GCY up to 19.61%.

GCY has also granted the Company top up rights, for a period of three years from execution of the Heads of Agreement, allowing Monument to maintain its shareholding position in GCY up to 15.31%; and to maintain its shareholding position in GCY up to 19.61%.

It is expected that a nominee of each of GCY and the placee under the Monument Private Placement will be appointed to the board of directors of the Company; and a nominee of the Company will be appointed to the board of directors of GCY. The Gascoyne JV Properties Acquisition, the Gascoyne Private Placement and the Monument Private Placement have been negotiated on an arm's length basis with the Company and each of GCY, the placee and the Company is at arm's length with each other. Upon completion of the Gascoyne JV Acquisition and the Monument Private Placement, it is expected that each of GCY and the placee will hold approximately 19.6% of the then issued shares in the enlarged capital of the Company.

The parties have agreed to complete the Gascoyne JV Acquisition and the Monument Private Placement 10 business days after satisfaction of all conditions or such other date as agreed. The Gascoyne JV Acquisition and the Monument Private Placement are expected to be completed by no later than November 20, 2014.

The Gascoyne Mineral Properties

The Gascoyne mineral properties include the Glenburgh, Dalgara and Mt. Egerton projects and each contains historical resources as described below. The Company believes that the quality of the data supporting the resources meets industry standards as they have been reported in line with JORC guidelines, and resource confidence categories and the reliability of the estimate are consistent with these standards.

Glenburgh

The Glenburgh Gold Project is located 341 kilometres by partially sealed road from Meekatharra and 391 kilometres from the Burnakura mill and has a historical JORC Indicated and Inferred resource of 21.3 million tonnes at 1.5 g/t Au for approximately 1.0 Million ounces of gold from several deposits.

The historical measured resource of 2.9 Mt @ 2.0 g/t Au for 180.5 kOz and historical indicated resource of 4.6 Mt @ 1.6 g/t Au for 232 kOz and a historical inferred resource of 13.9 Mt @ 1.3 for 591 kOz as per the 2012 JORC guidelines exist at a suite of deposits at Glenburgh as determined by BM Geological Services in the report Gascoyne Gold Deposits: Glenburgh, Dalgara and Mt. Egerton Resource Inventory (August 2014). The Glenburgh historical resources are reported at a 0.5 g/t Au cutoff. The Company believes that the quality of the data supporting the resources meets industry standards. The historical resources have been reported in line with

JORC guidelines, and resource confidence categories and the reliability of the estimate are consistent with this standard. Monument considers this historical resource estimate to be relevant to its ongoing review of the Gascoyne JV Properties Acquisition. However, readers are cautioned that a qualified person (within the meaning of National Instrument 43-101) has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves. The Company is not treating the historical estimate as current mineral resources or mineral reserves.

Table 1. Glenburgh historical resource inventory (0.5 g/tAu cutoff) and the historical classification as per JORC 2012 (note-totals may differ due to rounding)

Glenburgh Deposits	Measured			Indicated			Inferred		
	Tonnes (t)	Grade (g/t)	Gold(Oz)	Tonnes (t)	Grade (g/t)	Gold(Oz)	Tonnes (t)	Grade (g/t)	Gold (Oz)
Icon	1.7	1.5	82,500	1.7	1.4	77,000	4.1	1.3	168,000
Apollo	0.9	2.4	67,400	0.3	1.3	14,000	1.5	1.4	67,000
Tuxedo				0.7	1.2	29,000	1.2	1.0	37,000

SW Area							0.6	1.0	20,000
Grand Total	2.9	2.0	180,500	4.6	1.6	232,000	13.9	1.3	591,000

Exploration results obtained recently at the Glenburgh Gold Project demonstrate the significant potential for further discovery of gold mineralisation at this underexplored tenure. The recent discovery of the Chevelle prospect by GCY has yielded a promising result of 4m @ 8.4 g/t Au from 44 metres (true width = 2.6m) in Aircore hole GLAC 521. Chevelle lies 6 kilometres to the north east of the known Glenburgh deposits. Mineralisation is typical of the Glenburgh style hosted in quartz-feldspar-biotite-garnet gneiss. This new discovery has extended the known strike length of mineralisation at Glenburgh to over 18 kilometres (ASX: GCY 11/8/2014: New discovery extends Glenburgh gold system). In addition to this new discovery, RC drilling has confirmed the up dip extension of mineralisation at the Shelby deposit with an interval of 11m @ 1.1 g/t Au from 45 metres (true width 8.4m) being intersected. Monument is very enthused with the upside potential for additional exploration success at Glenburgh.

Table 2. Hole collar coordinates and details for Chevelle and Shelby Deposits

Hole ID	Type	GDA East	GDA North	RL	Depth	Dip	Azimuth	Prospect
GLAC 521	RC	420,239	7,195,858	307	50	-60	155	Chevelle
VRG 883	RC	411,597	7,192,098	300	50	-60	155	Shelby

Dalgaranga

The Dalgaranga Gold Project is located in the Murchison gold mining region approximately 70 kilometres North West of Mt. Magnet covering approximately 180 square kilometers. The historical indicated resource of 5.05 mt @ 1.7 g/t Au for 281.4 kOz and a historical inferred resource of 8.3 mt @ 1.7 for 457.1 kOz as detailed below as per the 2012 JORC guidelines exist at two separate deposits at Dalgaranga as determined by BM Geological

Services in the report Gascoyne Gold Deposits: Glenburgh, Dalgara and Egerton Resource Inventory (August 2014). The historical resources have been reported in line with JORC guidelines, and resource confidence categories and the reliability of the estimate are consistent with these standards. The Gilbey's historical estimate is reported at a 1.0 g/t Au cutoff grade and the Golden Wings historical estimate is reported at a 2.0 g/t Au cutoff grade. Monument considers this historical resource estimate to be relevant to its ongoing review of the Gascoyne JV Acquisition. However, readers are cautioned that a qualified person (within the meaning of National Instrument 43-101) has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves. The Company is not treating the historical estimate as current mineral resources or mineral reserves.

Table 3. Dalgara historical resource inventory and the historical classification as per JORC 2012

Dalgara Deposits	Indicated			Inferred		
	Tonnes (t)	Grade (g/t)	Gold (Oz)	Tonnes (t)	Grade (g/t)	Gold (Oz)
Gilbey's	4,731,000	1.60	240,000	8,167,000	1.70	445,000
Golden Wings	320,300	4.00	41,400	127,900	3.00	12,100
Grand Total	5,051,300	1.73	281,400	8,294,900	1.71	457,100

Mt. Egerton

The Mt. Egerton Gold Project is located 235 km North West of Meekatharra. Following completion of the Gascoyne JV Properties Acquisition, the JV parties intend to examine mining, upgrading and hauling the mineralisation to the Burnakurra mill for processing. This type of high grade resource appears to be ideal for the Burnakurra mill which would treat JV mineralisation on an agreed toll milling basis with the aim of providing early cash flow to the JV participants.

The historical measured resource of 32,100 tonnes at 9.5 g/t Au for 9,801 Oz, the indicated resource of 46,400 tonnes @ 5.3 g/t Au for 7,841 Oz and a historical inferred resource of 37,800 tonnes @ 5.1 g/t Au for 6,169 Oz as detailed below as per the 2004 JORC guidelines exist at the Hibernian deposit at Mt Egerton as determined by BM Geological Services in the report Gascoyne Gold Deposits: Glenburgh, Dalgara and Egerton Resource Inventory (August 2014). The historical resource has been reported at 2.0 g/t Au cutoff and in line with JORC guidelines, and resource confidence categories and the reliability of the estimate are consistent with these standards. Monument considers this historical resource estimate to be relevant to its ongoing review of the Gascoyne JV Properties Acquisition. However, readers are cautioned that a qualified person (within the meaning of National Instrument 43-101) has not done sufficient work to classify the historical estimate as current mineral resources or mineral reserves. The Company is not treating the historical estimate as current mineral resources or mineral reserves.

Table 4. Mt Egerton historical resource inventory (2.0 g/t Au cutoff) and the historical classification as per JORC 2004

Mt Egerton Deposits	Hibernian		
	Tonnes (t)	Grade (g/t)	Gold (Oz)
Measured	32,100	9.5	9,801
Indicated	46,400	5.3	7,841
Inferred	37,800	5.1	6,169

In addition to the high grade historical resources at Mt. Egerton, Monument is encouraged by the recent exploration success at this underexplored camp. RC drilling at the Gaffney's Find prospect intersected narrow, high grade quartz limonite veins hosted in greywacke sediments and shales at shallow depths, which remain open at depth and along strike (ASX: GCY 1/8/2014: Gold grades over 70 g/t Au confirmed at the Egerton gold project). Significant results from drilling at Gaffney's Find include:

- **MERC018: 8m @ 11.4 g/t Au from 31m (true width=4m), including 4m @ 21.2 g/t Au (true width=2m)**
- **MERC014: 4m @ 9.0 g/t Au from 44m (true width=2m), including 1m @ 31.6 g/t Au (true width=0.5m)**
- **MERC012: 2m @ 13.7 g/t Au from 9m (true width=0.5m).**

Two wide spaced shallow lines of 50m deep RC holes were completed on a spacing of approximately 250m at the Mako prospect, which targeted an extensive historical soil anomaly. The gold mineralisation is associated with quartz-pyrite veins hosted in dolerite and greywackes. Monument is encouraged as limited drilling has been completed over the extensive soil anomaly present at Mako. The geological setting of the Mako prospect is analogous to the high grade Hibernian deposit. Significant results from drilling at the Mako prospect include:

- **MEAC005: 7m @ 2.1 g/t Au from 40m (true width = 3.5m)**

Table 5. Hole collar coordinates and details for Gaffneys Find and Mako RC holes

Hole ID	Type	GDA East	GDA North	RL	Depth	Dip	Azimuth	Prospect
MERC012	RC	563,844	7,241,061	400	50	-60	300	Gaffney's Find
MERC014	RC	563,887	7,241,038	400	50	-60	300	Gaffney's Find
MERC018	RC	563,866	7,241,100	400	50	-60	300	Gaffney's Find

Monument intends to verify the historical estimates as current mineral resources under National Instrument 43-101 together with the exploration drilling results contained herein and prepare a technical report in accordance with the requirements of National Instrument 43-101 in relation to all the above properties which will include review of QA/QC procedures, database review, and certain confirmation drilling in combination with infill and extensional drilling in the future.

The technical information concerning the Gascoyne Gold Projects in this press release has been compiled, reviewed and approved by Darryl Mapleson (BSc (Hons), FAusIMM) who is retained by Monument Mining Limited as a Qualified Person as defined by National Instrument 43-101, and a Competent Person as defined by JORC guidelines. He has been working in Australia for Monument as an independent consultant.

President and CEO Robert Baldock said: "This JV Acquisition with Gascoyne brings together a business strategy that adds a potential gold inventory upside to the Company and delivers a potential significant regional operational development objective to build two more producing plants in addition to the Burnakurra Mill in the Murchison area. It also builds a strong partnership with a professional exploration team who has an understanding of the geology in the Murchison and Gascoyne areas and a proven success record in the discovery of gold resources and develop them to JORC compliance standards at low cost.

While Monument intends to continue its mining operational excellence in Western Australia, its JV partner would be focusing on replacement of depletion and increasing total inventory of ounces of gold in the ground for both JV participants. We are greatly impressed with what Gascoyne has achieved and look forward to working with their professional team in developing the operations to the benefit of shareholders in both Companies.

The GCY JV Acquisition is also a part of Monument's safe jurisdiction diversification strategy together with its

Murchison and Tuckanarra acquisitions, aimed to mitigate its single country risk as well as a single source of cash flow risk, once these projects can reach commercial production”.

About Monument

Monument Mining Limited (TSX-V:MMY, FSE:D7Q1) is an established Canadian gold producer that owns and operates the Selinsing Gold Mine in Malaysia. Its experienced management team is committed to growth and is advancing several exploration and development projects including the Mengapur Polymetallic Project, in Pahang State of Malaysia, and the Murchison Projects in Burnakura and Gabanintha, Western Australia. The Company employs over 300 people in both regions and is committed to the highest standards of environmental management, social responsibility, and health and safety for its employees and neighboring communities.

Forward-Looking Statements

This news release includes statements containing forward-looking information about Monument, its business and future plans ("forward-looking statements"), including statements with respect to completion of the Monument Private Placement, the Gascoyne Private Placement and the acquisition of the Gascoyne JV Acquisition properties and planned work at the Gascoyne JV Acquisition properties. The forward-looking statements in this news release are subject to various risks, uncertainties and other factors that could cause actual results or achievements to differ materially from those expressed or implied by the forward-looking statements. These risks and certain other factors include, without limitation: risk related to completion of the Monument Private Placement, the Gascoyne Private Placement and the acquisition of the Gascoyne JV Acquisition properties and planned work at the Gascoyne JV Acquisition properties, including the risk that required approvals will not be obtained, due diligence will not be satisfactorily completed or that the transactions will otherwise not complete; risks related to general business, economic, competitive, geopolitical and social uncertainties; uncertainties regarding the results of current exploration activities; uncertainties in the progress and timing of development activities; foreign operations risks; other risks inherent in the mining industry and other risks described in the management discussion and analysis of the Company and the technical reports on the Company's projects, all of which are available under the profile of the Company on SEDAR at www.sedar.com. Material factors and assumptions used to develop forward-looking statements in this news release include: that required approvals for the Monument Private Placement, the Gascoyne Private Placement and the acquisition of the Gascoyne JV Acquisition properties will be obtained, the Company's due diligence of the Gascoyne JV Acquisition properties will be satisfactorily completed and that the transactions will complete; expectations regarding the estimated cash cost per ounce of gold production and the estimated cash flows which may be generated from the operations, general economic factors and other factors that may be beyond the control of Monument; assumptions and expectations regarding the results of exploration on the Company's projects; assumptions regarding the future price of gold of other minerals; the timing and amount of estimated future production; the expected timing and results of development and exploration activities; costs of future activities; capital and operating expenditures; success of exploration activities; mining or processing issues; exchange rates; and all of the factors and assumptions described in the management discussion and analysis of the Company and the technical reports on the Company's projects, all of which are available under the profile of the Company on SEDAR at www.sedar.com. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

News Release

Release #24 - 2014

Monument's Fiscal 2014 Results

Gross Revenue of \$48.6M with Cash Cost of \$613/Oz

Vancouver, B.C. Monument Mining Limited (TSX-V: MMY and FSE: D7Q1) "Monument" or the "Company" today announced its annual financial results for the year ended June 30, 2014. All amounts are in thousands of United States dollars unless otherwise indicated (refer to www.sedar.com for full annual financial results).

President and CEO Robert Baldock commented on fiscal 2014 annual production and financial results: "While the gold price was low during the year, the Company continued its gold production with lower grade materials, before processing sulphide ore which is pending test results from its R&D programs. The Company will continue to use its surplus cash from operations for funding upside growth.

Our focus for the year ahead is the strategic development of our project portfolio and to increase our production profile. During fiscal 2014 the Company continued to grow its balance sheet with value added projects being acquired, which is aimed to take advantage of the downturn in our cyclical industry. The objective of the diversification strategy by spreading country risk, metal risk and single cash flow source risk is to become a mid-tier gold and base metals producer and build its inventory of metals to enable the ability to deliver sustainable dividends in due course."

Fiscal 2014 Highlights:

- Profit margin generated from gold production of \$16.3 million
- Gold production of 35,983 ounces ("oz") produced at an average cash cost of \$613/oz;
- Gross revenue of \$48.6 million, generated from gold sales of 37,670 oz;
- Net loss attributable to shareholders of \$2.6 million or \$0.01 loss per share ("EPS");
- Oxide Magnetite purchase and profit sharing agreement completed at the Mengapur project;
- Continued overhaul of Malaco plant and construction of iron beneficiation plant at Mengapur aimed at producing saleable iron products from oxide iron top soils;
- Acquisition of the Murchison Project in Australia and commencement of a targeted exploration programme; and
- Ongoing exploration at Buffalo Reef, Panau, Madang Ridge, Felda and Famehub for additional feed for the Selinsing mill.

Fourth Quarter and Fiscal 2014 Production and Financial Highlights

	Three months ended June 30		Year ended June 30	
	2014	2013	2014	2013
Production				
Gold production ⁽¹⁾ (ounces)	7,754	12,919	35,983	52,982

EPS – basic	(\$0.02)	\$0.05	(\$0.01)	\$0.14

This is Exhibit marked "6" referred to in the Affidavit of

.....
 Sworn before me at the city of Vancouver, Province of British Columbia, this 29th day of September, 2014.

.....
 A Commissioner for taking Affidavits for British Columbia

(Continued)	Three months ended June 30		Year ended June 30	
	2014	2013	2014	2013
Other	\$/oz	\$/oz	\$/oz	\$/oz
Average realized gold price per ounce sold	1,292	1,419	1,290	1,576
Cash cost per ounce ⁽³⁾				
Mining	262	125	219	112
Processing	357	224	326	207
Royalties	65	49	66	78
Operations, net of silver recovery	53	1	52	3
Total cash cost per ounce	\$687	\$399	\$613	\$400

- (1) Defined as good delivery gold bullion according to London Bullion Market Association ("LBMA"), net of gold dore in transit and refinery adjustment
- (2) Gold sold in fourth quarter 2013 and fiscal 2013 exclude 7,453oz that were released from security accounts.
- (3) Total cash cost includes production costs such as mining, processing, tailing facility maintenance and camp administration, royalties, and operating costs such as storage, temporary mine production closure, community development cost and property fees, net of by-product credits. Cash cost excludes amortization, depletion, accretion expenses, capital costs, exploration costs and corporate administration costs.

Production Results

Gold production for fiscal 2014 was 35,983 oz of gold, a decrease of 32% compared to 52,982 oz in 2013. Gold production for fourth quarter 2014 was 7,754 oz of gold, a decrease of 40% compared to 12,919 oz fourth quarter 2013. These decreases are a result of mining activities occurring in a different ore zone, contributing lower feed grade as expected in the mine plan. The lower feed grade along with a higher proportion of low grade sulphides from the deeper Selinsing ore zones has contributed to a lower processing recovery rate.

For fiscal 2014 Monument sold 37,670 oz of gold at an average realized price of \$1,290/oz (Fiscal 2013: 50,452 oz of gold, excluding 7,453 oz released from security accounts, at an average realized price of \$1,576/oz). During fourth quarter 2014 Monument sold 9,400 oz of gold (Q4 2013: 14,047 oz, excluding 7,453 oz released from security accounts) at an average realized price of \$1,292/oz (Q4 2013: \$1,419/oz).

Financial Results and Discussion

Revenue of \$48.58 million for fiscal 2014 was 47% lower than \$91.28 million for fiscal 2013. The decrease was primarily due to decreased gold sales (37,670 oz versus 57,905 oz), and by a lower average realized gold price year over year (\$1,290/oz versus \$1,576/oz). Revenue for fourth quarter 2014 was \$12.15 million, 60% lower compared to \$30.51 million in fourth quarter 2013.

Cash costs per ounce sold for fiscal 2014 and the fourth quarter were \$613 and \$687 respectively, compared to \$400 and \$399 for the corresponding periods last year. The increased cash cost per ounce is mainly due to a combination of lower head grades and rising costs on a per ounce basis. Processing costs per ounce were also higher due to the anticipated lower feed grades and recoveries.

Income before other items was \$6.88 million for fiscal 2014 compared to \$48.29 million in fiscal 2013. The decrease in income before other items is attributable to the lower gross margin generated from the Selinsing gold mine.

Net loss attributable to common shareholders for fiscal 2014 was \$2.63 million (\$0.01 per share - basic) compared to earnings of \$32.75 million (\$0.14 per share - basic) for fiscal 2013. The decrease in fiscal 2014 was also mainly caused by lower income from operations generated from the Selinsing gold mine.

Cash provided from operating activities was \$16.50 million in fiscal 2014 compared to \$54.75 million for the previous year. The difference was mainly due to lower production in 2014 and the lower gold price. Working capital as at June 30, 2014 was \$37.05 million (2013: \$61.42 million).

Acquisitions

Murchison Gold Project

As outlined in previous periods, to take advantage of current market conditions, the Company has continued to monitor

opportunities for growth in the form of continued acquisition of mineral resources in other countries (regions) such as Australia and Canada. At closing in February 2014, Monument paid consideration of AUD\$15 million cash in exchange for the Murchison Gold Project, including a number of mining and exploration tenements and lease applications covering approximately 98 square kilometers of land. The tenement package holds a Joint Ore Reporting Committee ("JORC") compliant historical resource, a fully operational gold processing plant, a newly developed camp site and all necessary infrastructure. Without distraction from its present operational program in Malaysia, Monument has moved quickly with an exploration program under a scoping study aimed to place this project into production.

Oxide Magnetite Purchase and Profit-Sharing Agreement

On February 6, 2014, pursuant to the terms of the Oxide Magnetite Purchase and Profit-Sharing Agreement with Malaco Mining Sdn. Bhd. ("Malaco"), the Company issued 25 million fully paid Monument common shares at a deemed price of CAD\$0.50 per share for certain overburden in top soils of approximately 1.2 million tonnes that were previously stockpiled at Area C of the Mengapur Project in conjunction with a profit sharing arrangement for production of magnetite and other saleable iron species from top soils at the same area.

This acquisition provides Monument with the potential to turn overburden mining costs into a profitable operation and add potentially significant value to the Mengapur Project for the benefit of all shareholders and investors. The removal of stockpiled material and overburden represents a large portion of upfront mine development and operation costs on the Mengapur Project, as the overburden would need to be removed before hard rock open pit material could be accessed for mining.

Research and Development

Treatment of Selinsing and Buffalo Reef Sulphide Ore

As mining enters the oxide/sulphide transition zone, the Selinsing gold processing plant is no longer treating high grade high recovery oxide ores, but lower grade leachable sulphide ores. Refractory sulphide mineralization will require different treatment to sustain gold production. The current mining and processing of Selinsing pit (sulphide) ores had a significant impact on the plant's performance that can lead to, if not appropriately handled through the plant, lower overall gold recovery. The Company has engaged highly experienced metallurgists during fiscal 2014 and is carrying out parallel studies for several alternatives including a flotation approach to produce gold or gold concentrate, and bio-heap leaching approach without flotation.

Oxide Iron and Copper in Area C

The Mengapur Project continues to represent the most significant opportunity for a long term mining asset owned by the Company with downstream commodity products. The preliminary economic assessment study ("PEA" study) was carried out during the year and is being continued subsequent to fiscal 2014. The PEA study will define Copper ("Cu"), Sulfur ("S"), Gold ("Au"), Silver ("Ag") oxide and sulphide resource under NI43-101 guidance, bringing the historical resources to current. A part of the R&D program conducted during the year was to support this study for development of a number of marketable downstream products. An on-site R&D laboratory has been built, fully equipped and placed in use during the year ended June 30, 2014.

During the fourth quarter, construction of an oxide iron beneficiation plant was initiated based on the existing processing plant bought from the Vendor as a part of Mengapur Acquisition, on which the refurbishment was partially complete in fiscal 2013. The oxide iron beneficiation plant is designed to separate iron from copper and other metals in the top soil and fresh rock at the Mengapur site. The test work will continue during the construction period to optimize the design and performance of the Plant. Once complete, the trial run will be expected to start from 1,000tpd, upon successful commissioning, production will begin and upgraded to 3,000tpd subsequently.

Exploration Progress

Exploration at Selinsing, Buffalo Reef and FELDA lands during fiscal 2014 were focused on the collation and interpretation of all geological, geochemical and geophysical data, mapping geological structures, updating the resource estimate and block model, and drilling additional oxide targets. The total fiscal 2014 exploration drill program at Selinsing, Buffalo Reef, and FELDA properties consisted of 119 diamond drill holes totaling 10,039 meters ("m"). An additional 16 metallurgy drill holes totalling 1,254m were also completed at Buffalo Reef during the fiscal year and 395 drill hole assays from Selinsing, Buffalo Reef, and FELDA were finalized and received from the SGS Malaysia commercial lab.

Exploration activities at Mengapur focused on the Company's previously stated Oxide Magnetite Development Plan, with further exploration activities being conducted during the year in support of the sulfide plan. The fiscal 2014 drilling programs included 4,490m of drilling in 50 drill holes with analyses in progress. Thirty-six of these drill holes focused on the Oxide Magnetite Development plan. Data collection and analysis continued for updating the resource estimate and NI 43-101 Technical Report. During fiscal 2014, 172 drill hole assays from the Star Destiny and Mengapur (CASB) properties were finalized and received from the onsite SGS-managed lab.

Exploration activities at Murchison during fiscal 2014 included a drill programme aimed at confirming historical resources, infilling current drill spacing for better confirmation of gold resources, as well as testing potential extensions to the deposit. This work will provide further confidence of the historical resources for future planning purposes and will also validate the previous drilling in order to upgrade the historical resource estimate to a NI43-101 compliant Mineral Resource. During fiscal 2014, the Company incurred \$1.27 million of expenditures on resource confirmation and exploration activities.

About Monument

Monument Mining Limited (TSX-V:MMY, FSE:D7Q1) is an established Canadian gold producer that owns and operates the Selinsing Gold Mine in Malaysia. Its experienced management team is committed to growth and is advancing several exploration and development projects including the Mengapur Polymetallic Project, in Pahang State of Malaysia, and the Murchison Projects in Burnakura and Gabanintha, Western Australia. The Company employs over 300 people in both regions and is committed to the highest standards of environmental management, social responsibility, and health and safety for its employees and neighboring communities.

Robert F. Baldock, President and CEO
Monument Mining Limited
Suite 1580 -1100 Melville Street
Vancouver, BC V6E 4A6

Forward-Looking Statement

This news release includes statements containing forward-looking information about Monument, its business and future plans ("forward-looking statements"). Forward-looking statements are statements that involve expectations, plans, objectives or future events that are not historical facts and include the Company's plans with respect to its mineral projects and the timing and results of proposed programs and events referred to in this news release. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". The forward-looking statements in this news release are subject to various risks, uncertainties and other factors that could cause actual results or achievements to differ materially from those expressed or implied by the forward-looking statements. These risks and certain other factors include, without limitation: risks related to general business, economic, competitive, geopolitical and social uncertainties; uncertainties regarding the results of current exploration activities; uncertainties in the progress and timing of development activities; foreign operations risks; other risks inherent in the mining industry and other risks described in the management discussion and analysis of the Company and the technical reports on the Company's projects, all of which are available under the profile of the Company on SEDAR at www.sedar.com. Material factors and assumptions used to develop forward-looking statements in this news release include: expectations regarding the estimated cash cost per ounce of gold production and the estimated cash flows which may be generated from the operations, general economic factors and other factors that may be beyond the control of Monument; assumptions and expectations regarding the results of exploration on the Company's projects; assumptions regarding the future price of gold of other minerals; the timing and amount of estimated future production; the expected timing and results of development and exploration activities; costs of future activities; capital and operating expenditures; success of exploration activities; mining or processing issues; exchange rates; and all of the factors and assumptions described in the management discussion and analysis of the Company and the technical reports on the Company's projects, all of which are available under the profile of the Company on SEDAR at www.sedar.com. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company does not undertake to update any forward-looking statements, except in accordance with applicable securities laws.
